SUMMARY

Product designer with 5 years of experience in AI-powered enterprise SaaS, specialising in conversational AI and agentic workflows for contract lifecycle management (CLM). Designed AskSirion, Sirion's conversational contract search, from real user questions to shipped answers with context awareness, disambiguation and verifiable sources. An engineering background and coded prototypes let me design within real model and data constraints.

SKILLS

AI & Conversational UX: Conversational AI design, agentic workflows, human-in-the-loop (HITL) review, disambiguation and clarification, context awareness and memory, confidence and uncertainty UX, explainability and source citations, AI response design

Product Design & Research: Interaction design, information architecture, complex enterprise workflows, design systems, accessibility (WCAG), user research, usability testing, journey mapping, cross-functional collaboration

Prototyping & Tools: Figma (variables, Dev Mode, advanced prototyping), coded prototypes in HTML/CSS/JavaScript, Claude, ChatGPT, Lovable, Miro, Jira, Notion

EXPERIENCE

UX Designer | Sirion.ai — Jul 2022 – Present

AI-native contract lifecycle management (CLM) platform for enterprise legal, procurement and finance teams

- **Designed AskSirion, Sirion's conversational contract search,** taking it from 201 real user questions to a shipped experience (April 2024) that became the centre of Sirion's October 2025 platform launch.
- **Built trust into AI answers** by designing visible reasoning steps and an on-demand "Explain" view, so users could check how AskSirion read their question before acting.
- **Defined how AskSirion keeps context** as users click through lists, charts, contracts and documents, so follow-up questions stay accurate; designed the indicator that shows what the AI is focused on. Shipped 2025.
- **Designed how AskSirion handles ambiguous questions** across large contract repositories: answering when confident, asking one quick clarifying question when not. Grounded in published UX and AI research.
- **Co-designing SirionNext's AI-powered Contract Detail Page** and human-in-the-loop template creation for Sirion's next-generation agentic CLM platform, surfacing key terms, obligations and risks with traceable sources.
- **Raised the design team's AI workflow** by building Claude skills and coded HTML/JS prototype kits the team uses to brief and prototype AI flows.

Product Designer | XOOG Edlearn Pvt. Ltd. (e-learning platform) — Feb 2022 – Jul 2022

- Designed the end-to-end application architecture and design guidelines for the platform, enabling the MVP to release 30% ahead of schedule and reducing onboarding friction by 40%.
- Redesigned the website in line with the product brand, contributing to a 25% increase in time-on-site and a 15% increase in sign-up conversions.

UI/UX Design Intern | Lloyd Harrington Pvt. Ltd. (recruitment software) — Dec 2021 – Jan 2022

- Designed wireframes and interactive prototypes for an in-product communication feature, improving the team collaboration flow during hiring.

EDUCATION

M.Tech, Design Engineering | National Institute of Technology (NIT), Jalandhar — 2019 – 2021

Led and published first-author thesis research using molecular dynamics simulation of carbon nanotube–polymer composites.

B.Tech, Mechanical Engineering | Graphic Era Hill University, Dehradun — 2013 – 2017

Languages: English, Hindi
